monarcamarine@gmail.com

We are a Florida company based on the Space Coast, and offer delivery to most of Florida and a few cities in Southern Georgia.

With over 30 years of welding experience, put into every project, we can complete custom welding for your trailers, boats and more.

Our stands are tough and sturdy and can hold your outboard motor (s) securely, to allow you to easily move your boat's outboard to perform maintenance, repairs, or display them in your showroom or tradeshow.

The stands are tall enough to hold long-shaft outboard motors and are built with steel to provide an ideal, heavy duty, sturdy mounting of your motor. Casters are added to each stand to allow for ease in moving the motor.

Each piece of the stand is sealed to avoid water intrusion and corrosion, and painted in glossy enamel with a rust preventative finish, or any color of your liking.

We offer *unbeatable value* as our stands are priced lower than most online retailers, and our stands hold more weight.

We are committed to providing you with unparalleled Customer Service, and strive to become your go to vendor for your stands.

The following catalog is what we currently produce, but we are happy to custom build your stand or other items to your needs, please reach out with your custom needs

**** We offer discounts for multiple stand orders ****

Small Motor Stand

- For dry weight of up to 250lbs
- Steel Tubing 1 ½ x 1 ½ and 3/16 thick
- Swivel Casters with brakes
- Caster total load 480lbs
